

## CONTROL YOUR SUN AND SKY

Industry's highest dynamic CCT range - mimics the CCT from the real sky.

### Virtual Sun 3,200K - 40,000K

By mixing the light from its LEDs, the Virtual Sun seamlessly generates a smooth and natural progression of daylight CCTs through a 24-hour cycle.

This gradual shift along the 'daylight locus' produces the most natural lighting experience possible.

### Typical Lighting Fixtures 2,700K - 6,500K

Other light fixtures are not capable of CCTs higher than 6500K, lacking the bright blue skies humans need and crave when inside.

## OVERVIEW

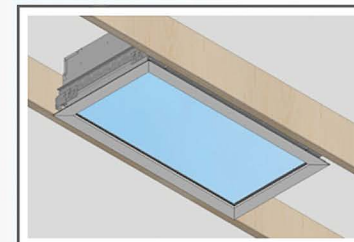

Flexible Control: CSB, 0-10V, DMX, DALI...  
Compatibility is not a concern.

CRI	90+
CCT	3,200K to 40,000K
DELIVERED LUMENS	IC-NON-IC 4,455 LUMENS IC-RATED 3,796 LUMENS
DIMENSIONS	38.2" X 20.7" DEPTH 10.7"
STANDARDS	UL 1598, TÜV, UL LISTED

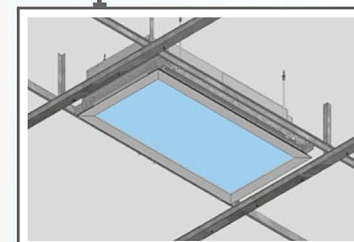

### Joist Installation

Fits joist ceilings with 24" spacing; offers flush or recessed mount.

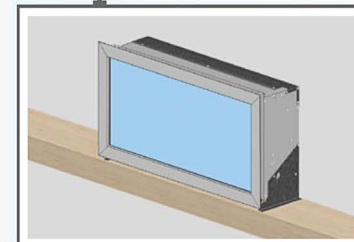

### Suspended Ceiling Installation

Compatible with 24" tiles; hangs from masonry or metal supports.

### Vertical Installation

Mounts vertically for 60-degree sun beam, simulates clerestory windows side by side.

# Virtual Sun

Create Sunshine,  
Anytime, Anywhere.

INNERSCENE

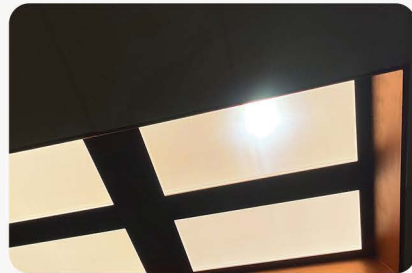

## HEALTHY BLUE SKIES AT HIGH CRI

Use Virtual Sun to meet **Well V2** Circadian requirements for daylight, supporting alertness and comfort while fostering a biophilic link to the sky.

### Suncast Technology

Virtual Sun emits a virtual sunlight beam at 30 degrees, enhancing spaces with a natural daylight feel.

And at night? As it approaches, Virtual Sun gently transitions into glow, replacing bright sun with a **relaxing, calming moon.**

## INFINITE DEPTH TECHNOLOGY

Utilizing advanced techniques like binocular vision and motion parallax, our Virtual Sun offers an ultra-realistic view of the sun and sky, simulating its appearance from **93 million miles away.**
