

Circadian Sky®

OVERVIEW - SPECIFICATION SHEET

DATEPROJECTSPECIFIERTYPE

DESCRIPTION

The Circadian Sky light fixture is the epitome of modern elegance and advanced technology. Inspired by the beauty of a double-pane window, it's versatile across multiple sizes, seamlessly integrating into any space. Its broad CCT range from 2,200K to 40,000K captures the full range of natural daylight. Beyond aesthetics, its impressive CRI over 92 and 1-Step Macadams Step digital calibration ensures unmatched color accuracy, making every shade come alive with precision. Further enhancing its credentials is its capability to emit light with Melanopic Ratios above 1.6, promoting well-being by aligning with our natural circadian rhythms.

With Circadian Sky, experience the fusion of style, health, and true color brilliance.

MAX LUMENS	2030	2610	2610	4350	2610
FEATURES					
<p><b>Dual-reflectance technology</b></p> <p>Circadian Sky expertly replicates the characteristics of a double-pane window, employing advanced reflective technology to foster a heightened sense of depth and realism. Through the integration of a highly reflective light guide panel, a secondary reflection is induced, mimicking the distinctive double reflections found in traditional windows and enhancing the spatial perception of your environment.</p> <p><b>DUOGLASS™</b></p> <p>Innerscene proprietary multilayering of our ATMOS PLATFORM™ and ANSI-rated tough tempered glass, when combined with an integral deep regress, our Circadian Sky fixture is not only highly durable but also looks incredibly realistic when compared to a traditional double-glazed sky light.</p> <p><b>GLASS SAWFETY STANDARDS : ANSI Z97.1-2015: SAFETY GLAZING</b></p>					
<p><b>ATMOS PLATFORM™</b></p> <p>Innerscene proprietary ATMOS PLATFORM™ has been in development for nearly a decade and comprises a mix of specially selected light sources providing a natural sky experience that mimics outside conditions from a warm amber of sunrise and sunset to true tones of a deep blue tropical skies while keeping color accurate throughout. The ATMOS PLATFORM™ runs on our custom logic board designed to suit the needs of installations with a variety of lighting controls such as 0-10V, DMX, DALI or Casambi.</p> <p><b>TRUSKY™</b></p> <p>Innerscene proprietary TRUSKY™ is able to deliver an industry first single-step MacAdam ellipse using specially calibrated industrial metrology devices to deliver accurate and consistent colors, far above the industry standard of 3-steps.</p>					
TRIM					
<p><b>Field-paintable seamless uniframe</b></p> <p>Circadian Sky's seamless uniframe design integrates the entire front face and trim of the fixture into a single seamless snap-fit metal piece that can be easily handled on site.</p> <p>The seamless uniframe allow for effortless tool-less installation and servicing of the fixture.</p> <p><b>Trim finishes</b></p> <div><div><p><b>WHITE RAL9010*</b></p><p>A standard trim finished in white RAL9010 coating.</p></div><div><p><b>CUSTOM</b></p><p>Any color/coating to match specific needs (e.g., anti-microbial, RAL9016 30% glass).</p></div></div> <p><b>Behavioral Health Trim Option</b></p> <p>Complies with New York State Office of Mental Health (NYSOMH) guidelines</p> <p>Optional Behavioral Health Trim adder is suitable for high abuse environments.</p> <p><b>Mounting:</b> mud-in drywall with wood or metal framing ceilings.</p> <p><b>Tamper-Resistant Fasteners:</b> T20 #8 Torx Security Screws (field paintable)</p>				 <div><p><b>Inner lens:</b> Clear Tempered Glass.</p><p><b>High Abuse Outer lens:</b> 0.125 in Clear Polycarbonate.</p><p><b>Anti-Ligature Housing:</b> Aluminum.</p><p><b>Finish:</b> White RAL 9010 Matt powder coat as standard, optional Antimicrobial powder coat</p></div>	
All trims are designed to be field-paintable, ensuring seamless integration into diverse design visions.

WIRING

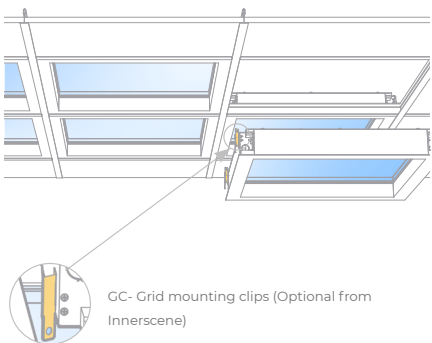

Below are the detailed wiring components and electrical elements of Circadian Sky:

1. Power or Control Wires Romex NM-B (Compatible with FMC)
2. Wire Connector to Fit 1/2" K.O. (Up To 8 x 1/2" K.O. Provided)
3. Wago Wire Connector (Supplied)
4. Power Supply (Supplied)
5. Dimming Wires (2 Channels 0-10V Shown)
6. Innerscene Circadian Sky Logic Board

PHOTOMETRIC DISTRIBUTION POLAR CURVE

ATMOS PLATFORM™ 4+ CHIP COLOR SYSTEM

The ATMOS Platform in Circadian Sky features a four-chip LED system designed for high Color Rendering Index (CRI) and precise chromaticity control. This system uses four different LED chips/ colors to achieve accurate CIE xy coordinates, closely following the daylight locus and blackbody curves over a broad range from 2200K to 40000K.

In comparison, traditional two-chip tunable white systems incorporate only two types of white LEDs. These systems provide limited adjustable color temperature but lack the comprehensive CRI and exact CIE xy point control offered by the four-chip configuration in the ATMOS Platform. This design enables a lighting experience that more accurately replicates the variability, color, and spectrum of natural daylight.

PROGRAMMING CODE

Programming Codes are used to load predefined settings and schedules onto Primary fixtures prior to shipping and on site. (\*)  
**P0000** - Dimmer Only. When selected Primary fixtures will only respond to external dimmer controls (0-10V, DMX, DALI, Casambi).  
**P0002** - Default programming. Learn more by visiting <https://innerscene.com/programCode?code=P0002>

Find/create other programming schedules by visiting <https://innerscene.com/programCode>

\* Secondary fixtures use Innerscene's wireless synchronization to mirror the primary unit when set to the same zone.

PROGRAMMING CODE EXAMPLE FOR P0002 :

Wireless Group ⓘ Wireless Sync Zone 1

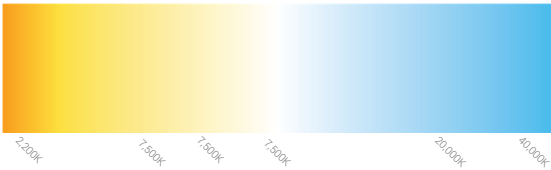

Idle resume ⓘ after 6 hours

Power On State ⓘ Schedule

Active Days ⓘ Active: Weekdays ▼

Schedule relative to ⚙ Clock • Sunrise

COLOR TEMPERATURE RANGE

Colors of white light are referred to as CCT in Kelvin, lower numbers are warmer tones, higher numbers are cooler or bluer tones. There is no upper limit of Kelvin. However, in Non-Innerscene products may have blue skies with low color rendition leading to color casts which can be unpleasant.

- 40,000K : Innerscene's deepest blue sky
- 20,000K : Blue Sky
- 6,500K : Pure White - highest color temperature for commercial lighting
- 3,500 - 4,000K : Commercial White
- 2,700 - 3,000K : Warm White - comparable to bright incandescent lamps
- 2,200K : Warmest hues of sunrise or sunset
