**DESCRIPTION**

Innerscene's Virtual Sun system offers cutting-edge simulations of natural daylight and moonlit skies at any time. Harnessing patented technology, it offers lifelike views through an infinite-depth skylight or window, aligns with circadian rhythms, and boasts straightforward installation.

The advanced technology stimulates physiological and emotional responses akin to natural daylight without exterior access. Applicable in fields like education, entertainment, healthcare, and more.

Innerscene's system removes design limitations, offering a tailored virtual daylight experience that enhances well-being.

### COLOR TEMPERATURE RANGE

Colors of white light are referred to as CCT in Kelvin, lower numbers are warmer tones, higher numbers are cooler or bluer tones. There is no upper limit of Kelvin. However, in Non-Innerscene products may have blue skies with low color rendition leading to color casts which can be unpleasant.

- 40,000K : Innerscene's deepest blue sky
- 20,000K : Blue Sky
- 6,500K : Pure White - highest color temperature for commercial lighting
- 3,500 - 4,000K : Commercial White
- 2,700 - 3,000K : Warm White - comparable to bright incandescent lamps
- 2,000K : Warmest hues of sunrise or sunset
- 1,800K : Dimmed incandescent lamps

**SPECTRAL INFORMATION**

**PROGRAMMING CODE**

Programming Codes are used to load predefined settings and schedules onto Primary fixtures prior to shipping and on site. (\*)

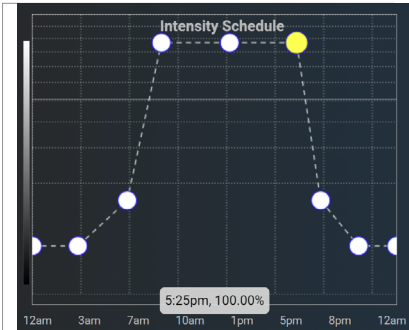

**P0000** - Dimmer Only. When selected Primary fixtures will only respond to external dimmer controls (0-10V, DMX, DALI, Casambi).

**P0002** - Default programming. Learn more by visiting <https://innerscene.com/programCode?code=P0002>

Find/create other programming schedules by visiting <https://innerscene.com/programCode>

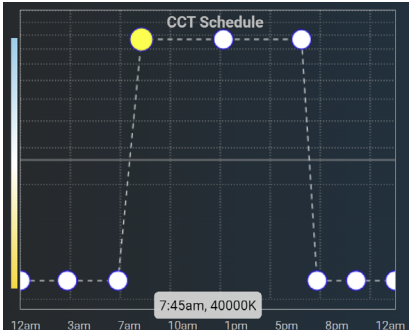

\* Secondary fixtures use Innerscene's wireless synchronization to mirror the primary unit when set to the same zone.

**PROGRAMMING CODE EXAMPLE FOR P0002 :**

**Intensity Schedule**

5:25pm, 100.00%

**CCT Schedule**
